WALL SYSTEMS

VARCO PRUDEN BUILDINGS

RPR™ WALL PANEL

FEATURES

- Reverse rolled version of VP's Panel Rib design
- Available in 26, 24 or 22 gauge
- 36" wide panel with 1-1/4" deep ribs 12" OC
- Available up to 41' in length
- Variety of color options with KXL finish and a 25-year paint warranty
- Installed with self-drilling color-matched fasteners
- Fasteners installed in recessed rib

BENEFITS

- Variety of gauge thicknesses to meet most codes and specifications
- Engineered for durability and aesthetically pleasing
- Superior paint finishes reduce maintenance costs
- RPR's recessed fastener locations give the panel a semi-concealed profile with bold architectural lines
- Accomodates more insulation for higher energy efficiency

VARCO PRUDEN

RPR WALL PANEL

This functional wall panel accommodates additional insulation for greater energy efficiency

RPR panel is an attractive, high quality, low maintenance panel based on a "reverse rolled" version of VP's standard Panel Rib design.

RPR is a 36" wide panel with a 1-1/4" rib profile. Available in lengths of up to 41', RPR can provide continuous coverage from foundation to eave, eliminating the need for end laps and assuring superior weather tightness. Panels come standard in sturdy 26 gauge steel or in 24 and 22 gauge options.

RPR panel's deeper profile accommodate up to 6" of faced blanket insulation or up to 2-1/2" of rigid board, creating a more thermal efficient building envelope.

All gauges of RPR are available in fourteen (14) standard colors with KXL finishes. The KXL paint system is a PVDF finish applied to the zinc or zinc aluminum coated steel to give a long-life color that resists fading and chalking. KXL is a 1 mil nom. PVDF finish with 70% Kynar® 500 or Hylar® 5000 standard.

RPR's recessed fastener locations give the panel a semi-concealed profile with bold architectural lines. RPR comes with a complete trim package including gutter and rake trim, corners and base trim to provide an attractive finished appearance. VP also offers a full line of high quality accessories including doors and windows designed to give years of trouble-free service.

Note: All panels formed from light gauge metal may exhibit waviness, also known as "Oil Canning," commonly occurring in, but not restricted to, flat portions of a panel. This inherent characteristic is not a defect of material or manufacturing and is not cause for rejection.
