VARCO PRUDEN

TECH FOUR™ WALL PANEL

An attractive wall panel with bold architectural lines and concealed fasteners

A unique architectural wall system that is easy to install featuring concealed fasteners and an attractive, embossed finish.

Tech Four offers 2" depth and 16" coverage with 1/4" high by 4" wide alternating fluted profile. Available in lengths of up to 40', Tech Four can provide continuous coverage from foundation to eave — eliminating the need for end laps and assuring superior weather tightness. Manufactured in sturdy 24 gauge steel for added strength and erectability.

These durable panels easily adapt to a variety of insulation options (including batt, blanket or rigid board) creating a more energy-efficient building envelope.

Available in VP's long-life KXL finish with 70% PVDF (Kynar 500 or Hylar 5000). Choose from:

Cool Arctic White,	Cool Cobalt Blue,
Cool Colonial Red,	Cool Cotton White,
Cool Dark Bronze,	Cool Egyptian White,
Cool Granite Gray,	Cool Imperial Blue,
Cool Leaf Green,	Cool Sierra Tan,
Cool Straw Gold,	Cool Zinc Gray.

Tech Four's interlocking fastener locations give the panel a concealed profile with bold architectural lines. A complete trim package including gutter and rake trim, corners and base trim are available to provide an attractive finished appearance.

Note: All panels formed from light gauge metal may exhibit waviness, also known as "Oil Canning," commonly occurring in, but not restricted to, flat portions of a panel. This inherent characteristic is not a defect of material or manufacturing and is not cause for rejection.
